

"Why Ventilate?"

Air ventilation is critical to the performance of a roofing system and the interior comfort of a home. Without proper ventilation, heat and moisture will build up, causing damage to shingles, deck sheathing problems, and lead to truss and structure issues. Attics need to breathe to keep cool and dry with proper ventilation. Doing so will reduce utility bills, prevent mold and mildew, extend shingle and roof deck life, eliminate damaging ice dams in the winter, and reduces air conditioning maintenance costs in the summer.

Python Steep Slope Ventilation System

Weather-Tite™ Rolled Ridge Vent

3-IN-1 FlexFit Ridge Vent

65 Slant Back Vent

150 Round Vent

Value drives everything we do. That's why we developed the Python Steep Slope Ventilation Division. This comprehensive line of products offers easy installation, remarkable building ventilation, lower utility costs, extended shingle and roof deck life, extreme durability, and outstanding warranties. Get more quality, more performance, and more value..... from Python™

If It's Not Proven, It's Not Marco

Investing in Quality

For more than 25 years, we have made the best ventilation and accessories for metal roofs - period. We are excited to offer a new steep slope ventilation line with the same great standards and highest quality products. We have assembled the best people and capabilities to deliver superior quality and outstanding performance. We invest in innovative design and manufacturing, including the only specialized non-woven material manufacturing capabilities in the industry. This competitive advantage allows us to use specially formulated polyester in our ventilation products - manufactured from recycled material - to prevent moisture absorption and to help keep dust, dirt, and bugs out of your attic.

Perfectly Positioned to Deliver

Our corporate headquarters and almost 220,000 square feet of made in the USA manufacturing and warehousing are centrally located in Tulsa, Oklahoma. From here, and through several distribution facilities across North America, we deliver Marco quality coast to coast.

A Full and Innovative Ventilation Line for Steep Slope Roofs

Roofing Ventilation & Accessories

Python™ Steep Slope Ventilation Extending the Life of Your Roof

The Python™ steep slope ventilation line offers several options when it comes to ridge vents or static vents. Our full and innovative line offers venting solutions that are environmentally friendly while offering superior performance and easy installation. Several of our products feature an exclusive non-woven polyester material that delivers long-lasting resiliency and breathes, to help prevent moisture infiltration.

Python Weather-Tite™ Rolled Ridge Vent

- Available in 20' and 50' roll lengths
- 8", 10.5", and 11.75" roll widths
- Non-woven material made from a modified polyester material.
- Effectively blocks insects, bats, birds, and wind-borne debris, dust and dirt.
- High performance - no clogs, deterioration, or dirt and snow trapping.
- Resists damage from ice, hail, and other weather. No warping and less loosening problems.
- Backed by a limited lifetime warranty
- 17.5 Square Inches of Net Free Venting Area

Python Weather-Tite™ FlexFit™ 3-IN-1 Ridge Vent

- Features a non-wicking modified polyester weather barrier providing superior net-free ventilation area while blocking out moisture, pests, and dust.
- Converts from 12" to 10" or 9" ridge vent by simply scoring the groove on the top of the vent.
- Closed external baffles make it less likely to collect debris resulting in diminished airflow.
- Built-in self-closing end caps, no additional parts or labor required.
- Suitable for any pitch from 2/12 to 12/12.
- 84 Square Inches of Net Free Venting per piece.

Python FlexFit™ 3-IN-1 Ridge Vent

- Converts from 12" to 10" or 9" ridge vent by simply scoring the groove on the top of the vent.
- Closed external baffles make it less likely to collect debris resulting in diminished airflow.
- Built-in self-closing end caps, no additional parts or labor required.
- Suitable for any pitch from 2/12 to 12/12.
- 84 Square Inches of Net Free Venting per piece.
- Made from no-break polypropylene
- Comes with a bag of 30 - 3" nails.

Python 65 Slant Back Vent

- Can be used as an intake or exhaust vent.
- 65 Square Inches of Net Free Venting Area.
- Class 4 impact resistance rated.
- Suitable for any roof pitch from 2/12 to 16/12.
- 4 Side Crickets: sheds water around the throat of the vent, making it virtual leak proof.
- Prevents wind driven rain from entering the vent.
- Arrow locking mechanisms prevent cap blow offs.
- Will not dent or rust.
- Comes in three colors: Black, Brown, Weatherwood.

Python 150 Round Vent

- 150 Square Inches of Net Free Venting Area.
- Class 4 impact resistance rated.
- Suitable for any roof pitch from 2/12 to 16/12.
- Made of high impact polypropylene with heat stabilizers and UV inhibitors throughout.
- Will not dent or rust.
- Requires a square cut out which is easier to cut on a roof.
- Comes in three colors: Black, Brown, Weatherwood.
